

## EB GS57 - Crystal Glacier Vessel Sink

Vessel sinks add exuberance to any bathroom with their unique ability to match any color scheme and style to create a space that is uniquely you. Offering a more lavish aesthetic and creative appeal to your household bathroom, these sinks can be fabricated in a number of materials. This sink in particular boasts a beautiful crystal glacier color and is made out of glass. Professionally polished for an end product that is sleek and glossy, this material is admired for its ease of cleaning and smooth texture. Additionally, tempered glass is harmless compared to other materials due to the way in which it breaks, protecting users from cuts.

### Features:

- High quality, tempered glass for scratch resistance
- High chemical and thermal shock resistance
- Stain-resistant and easy to clean surface
- Non-porous surface prevents discoloration and fading
- Designed for simple above counter / vessel installation
- Closed plumbing surface view
